### DETAILED ACTION

\*\*\* This office action is in response to Applicant's Pre-amendment filed on December 07, 2000. Claims 1-21 were originally filed in this application. Claims 1-10, 12-13 were canceled. Since there were no claims 21-42 in this present application, newly added Claims 43-45 are renumbered as 21-25, respectively, under Rule 37 CFR 126. Accordingly, pending claims 11, 12-20, and 21-25 (renumbered claims) will be referred all subsequent office action.

#### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claim 11, drawn to an integrated circuit, classified in Class 257, subclass 327.
- II. Claims 12-20, 21-25, drawn to a method, classified in Class 438, subclass 301.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). Unpatentability of the group I invention would not necessarily imply unpatentability of the group II invention, since the device of the group I invention could be made by process material different than those/that of the group II invention. For example: lithographically forming the opening having a selected dimension.

Because these inventions are distinct for the reasons given above and have acquired a separate status as shown by the above different classifications and as given in the above examples, the fields of search are not co-extensive and separate examination would be required, restriction for examination purposes as indicated is proper.
